Young™ Elite Original™ Cup

Outer and inner ridges. The strategically placed
ridges are designed to provide exceptional stain
removal, deliver better interproximal cleaning, and
greatly reduce splatter. Pack of 144pc.

DryTips®, small

The moisture absorption is far superior to cotton rolls
or other absorbent pads. They don't lose moisture
when handled. DryTips® facilitates working far back
in the oral cavity by keeping the procedure area
clean and dry. Pack of 50pc.

2Tone™ Anfärbelösung

Highlights both older and newer plaque with an
advanced multi-colored formula. 2Tone™ turns
newer plaque red and older plaque blue. Erythrosine
free. Bottle 59ml.

Young™ Polish Paste, Mint

Less splatter, fluoride free and powered by baking
soda, a time-honored ingredient known for its ability
to whiten, brighten and neutralize pH. Gluten-free.
Pack of 125 units.

Power control at your fingertips. No foot-control required.

The head can be positioned in six different angles to best suite different procedures and easily access all areas of the oral cavity.

It is possible to set a wide-range of speeds from 500-2,500 min⁻¹. iProphy can be used for a wide-range of procedures.

Simple head switching using the quick joint system.

As standard option, iProphy is available with iFX57 head for screw-in cups (as shown above). As an option, iProphy can be used with Disposable Prophylaxis Angles (DPA). In such a case, we recommend to choose iProphy without head (REF Y150069; 873 €*) and the PR-F adapter. Screw-in cups and DPA are not included in the standard packages.

Osseo 100

OSSEOINTEGRATION MEASURING DEVICE

Osseo 100 measures implant stability and osseointegration to enhance decisions about when to load the implant. Especially important when using protocols with shorter treatment time and treating higher risk patients. The uncomplicated operation that measures the Implant Stability Quotient (ISQ) with the help of a MultiPeg (available for most implant types) allows the implant loading period to be planned in advance.

MODELL **Osseo 100**
REF **Y1004175**

Osseointegration Measuring Device

2.055€*

3-STEP PROCEDURE

1. The MultiPeg is attached to the implant. It screws effortlessly into the implant's internal threads (approx. 6-8 Ncm of torque).

2. Just aim for the magnet on top of the MultiPeg. Non-invasive, objective, accurate and repeatable. The peg is excited by magnetic pulses and vibrates due to the stiffness in the contact area between the bone and the implant surface.

3. An ISQ value is generated and shown on the display. This reflects the level of stability on the universal ISQ scale from 1 to 99. The higher the ISQ value, the more stable the implant.

MultiPeg™

33€*

Reusable MultiPeg™

- For all major implant systems⁴⁾
- Tissue friendly, durable Titanium
- 20x autoclavable
- Optimal platform fit
- ISQ Standard Calibrated™

⁴⁾ There are different MultiPegs available especially designed for diverse implant systems and models. Find a regularly updated overview on www.nsk-europe.de.
